CSS DESIGN LIMITED

Hallin Marine Subsea International, Minnow Marine Projects Ltd, STX Canada Marine Inc and M3 Marine Pte Ltd, who together form CSS Design Ltd, today announced their CSS (Compact Semi-Submersible) concept vessel at The Annual OSJ Conference 2009, London, 24th February 2009

CSS Design Ltd has developed the CSS project and was formed exclusively to develop and market the design.

It grew from the co-operation of four different companies who all saw the technical and cost advantages behind the concept of the design from the very early stages.

Hallin Marine Subsea International PLC, Minnow Marine Projects Ltd and STX Canada Marine Inc (formerly Aker Yards Marine), have developed, through an arrangement brokered by M3 Marine Pte Ltd, a vessel design that responds to the need for greater flexibility along with the capability to provide cost effective solutions in both subsea services and well intervention along with a variant for high occupancy accommodation.
