M³
MARINE
REMOTE INSPECTION

Job Details

INSPECTIONS ENGINEER M3 MARINE GROUP PTE LTD

www.m3marine.com.sg

DESCRIPTION:

M3 Marine Group, through **M3 Marine Remote Inspection**, now offers **remote surveying and inspection services** to ship owners, shipyards, ship management companies and Classification societies for both onshore and offshore marine projects and assets. Committed to meeting the growing local and international demand for specialised offshore marine expertise, we are looking to grow our **local** (Singapore based) remote inspections team with qualified and experienced **Inspection Engineers** who have a passion for the latest inspection technologies (including drones and robotics).

JOB DESCRIPTION:

- Project planning and communicating project objectives, plans and risk assessments to clients and other project stakeholders
- Work closely with and support in-house drone and mini-ROV operators to capture the required data
- Review images and videos to assess and comment on the assets under inspection
- Guide clients in reviewing live feeds, obtaining feedback and providing guidance to drone and mini-ROV operators to achieve project goals
- Edit images and videos, write technical reports
- Support the operation, repair, maintenance, calibration, R&D, mobilisation and demobilisation of drones and mini-ROVs and other associated equipment
- M3 will provide drone and mini-ROV training for use in marine inspection scenarios (deploying of equipment onboard vessels / platforms, alongside wharf / jetty / shipyard, at anchorage / offshore, tank inspection, confined spaces, hull / underwater inspection)

JOB REQUIREMENT:

- Marine Engineer with at least 3 years' shipboard marine engineering experience
- Mechanical, Electrical and/or Electronics Engineer with at least 3 years' working experience in shipyards as Production Engineer, Project Engineer, Design Engineer or Supervisor; or
- Naval Architect with at least 4 years' experience in Quality Assurance / Quality Control or hull or project department
- Good technical understanding of the functionality of typical marine equipment, structures and assets
- Good understanding of typical materials, coatings, damage mechanisms and anomalies associated with marine or offshore oil and assets
- Good understanding of IACS rules, especially ABS, BV, DNV-GL and Lloyds Register class rules
- Proficient in MS Office, AUTOCAD
- Excellent written and verbal communications skills (English)
- Self-motivated, has good initiative, keen eye for details, team player
- Willing to travel

OTHERS (GOOD TO HAVE):

- Certified welding technician / inspector
- Marine paint and corrosion technician / inspector
- NDT technician / inspector

Applicants should email their CV to recruiting@m3marine.com.sg. Only shortlisted candidates will be notified.
